ABOUT US

OVER 65+ YEARS OF SAFELY BUILDING EXCELLENCE

A.P. Construction, Inc. is a family-owned, 4th generation general construction firm established over six decades ago. The company began humbly, installing pipe in the cobblestone streets of Philadelphia.

Today, A.P. Construction has grown into a multi-million dollar reliable and reputable organization, with over 200+ employees and a 500+ fleet of company-owned equipment. We have a diversified project portfolio and a diverse workforce.

A.P. utilizes cutting-edge construction technology, which brings our teams together and makes building safer, while maximizing productivity and minimizing wasted effort and expense.

A.P. has expertise in various industry sectors including construction management, general building, as well as marine, security, site development, transportation utility construction, solar and sustainability/LEED construction.

A.P. Construction is now operated by the third and fourth generations of the Petrongolo family, with guidance from Fran, Sr., whose wisdom, experience and attention to detail steadies the fast-paced rhythm of A.P.

Learn more about A.P. Construction's vision, mission and core values on page 32.

CITY OF... "BROTHERLY LOVE"

Our story began long ago with a used, red Ford pickup truck and a shovel. It is a legacy that started with Amedeo Petrongolo, Sr., who founded the company, together with his five sons, in 1954. The initials "A.P." were much more than a logo to him — they stood for his name and reputation.

We believed in the power of hard work and dedication. The five brothers and their father arrived early and stayed late – to do everything possible to push forward and advance each project. We took great pride in the work A.P. performed, always stressing commitment to safety, quality and client satisfaction.

After many years of effort and perseverance, A.P. began contracting utility work in the entire Tri-State area. A.P. then started building facilities, reconstructing tunnels and managing large comprehensive projects. Partners and clients embraced our superior work ethic and the corporation prospered hand-in-hand with business relationships.

Today, the round red symbol with the letters A.P. has become well-known throughout the region, representing stability and progress. The permenance and longevity come from growing organically into a thriving general construction firm.

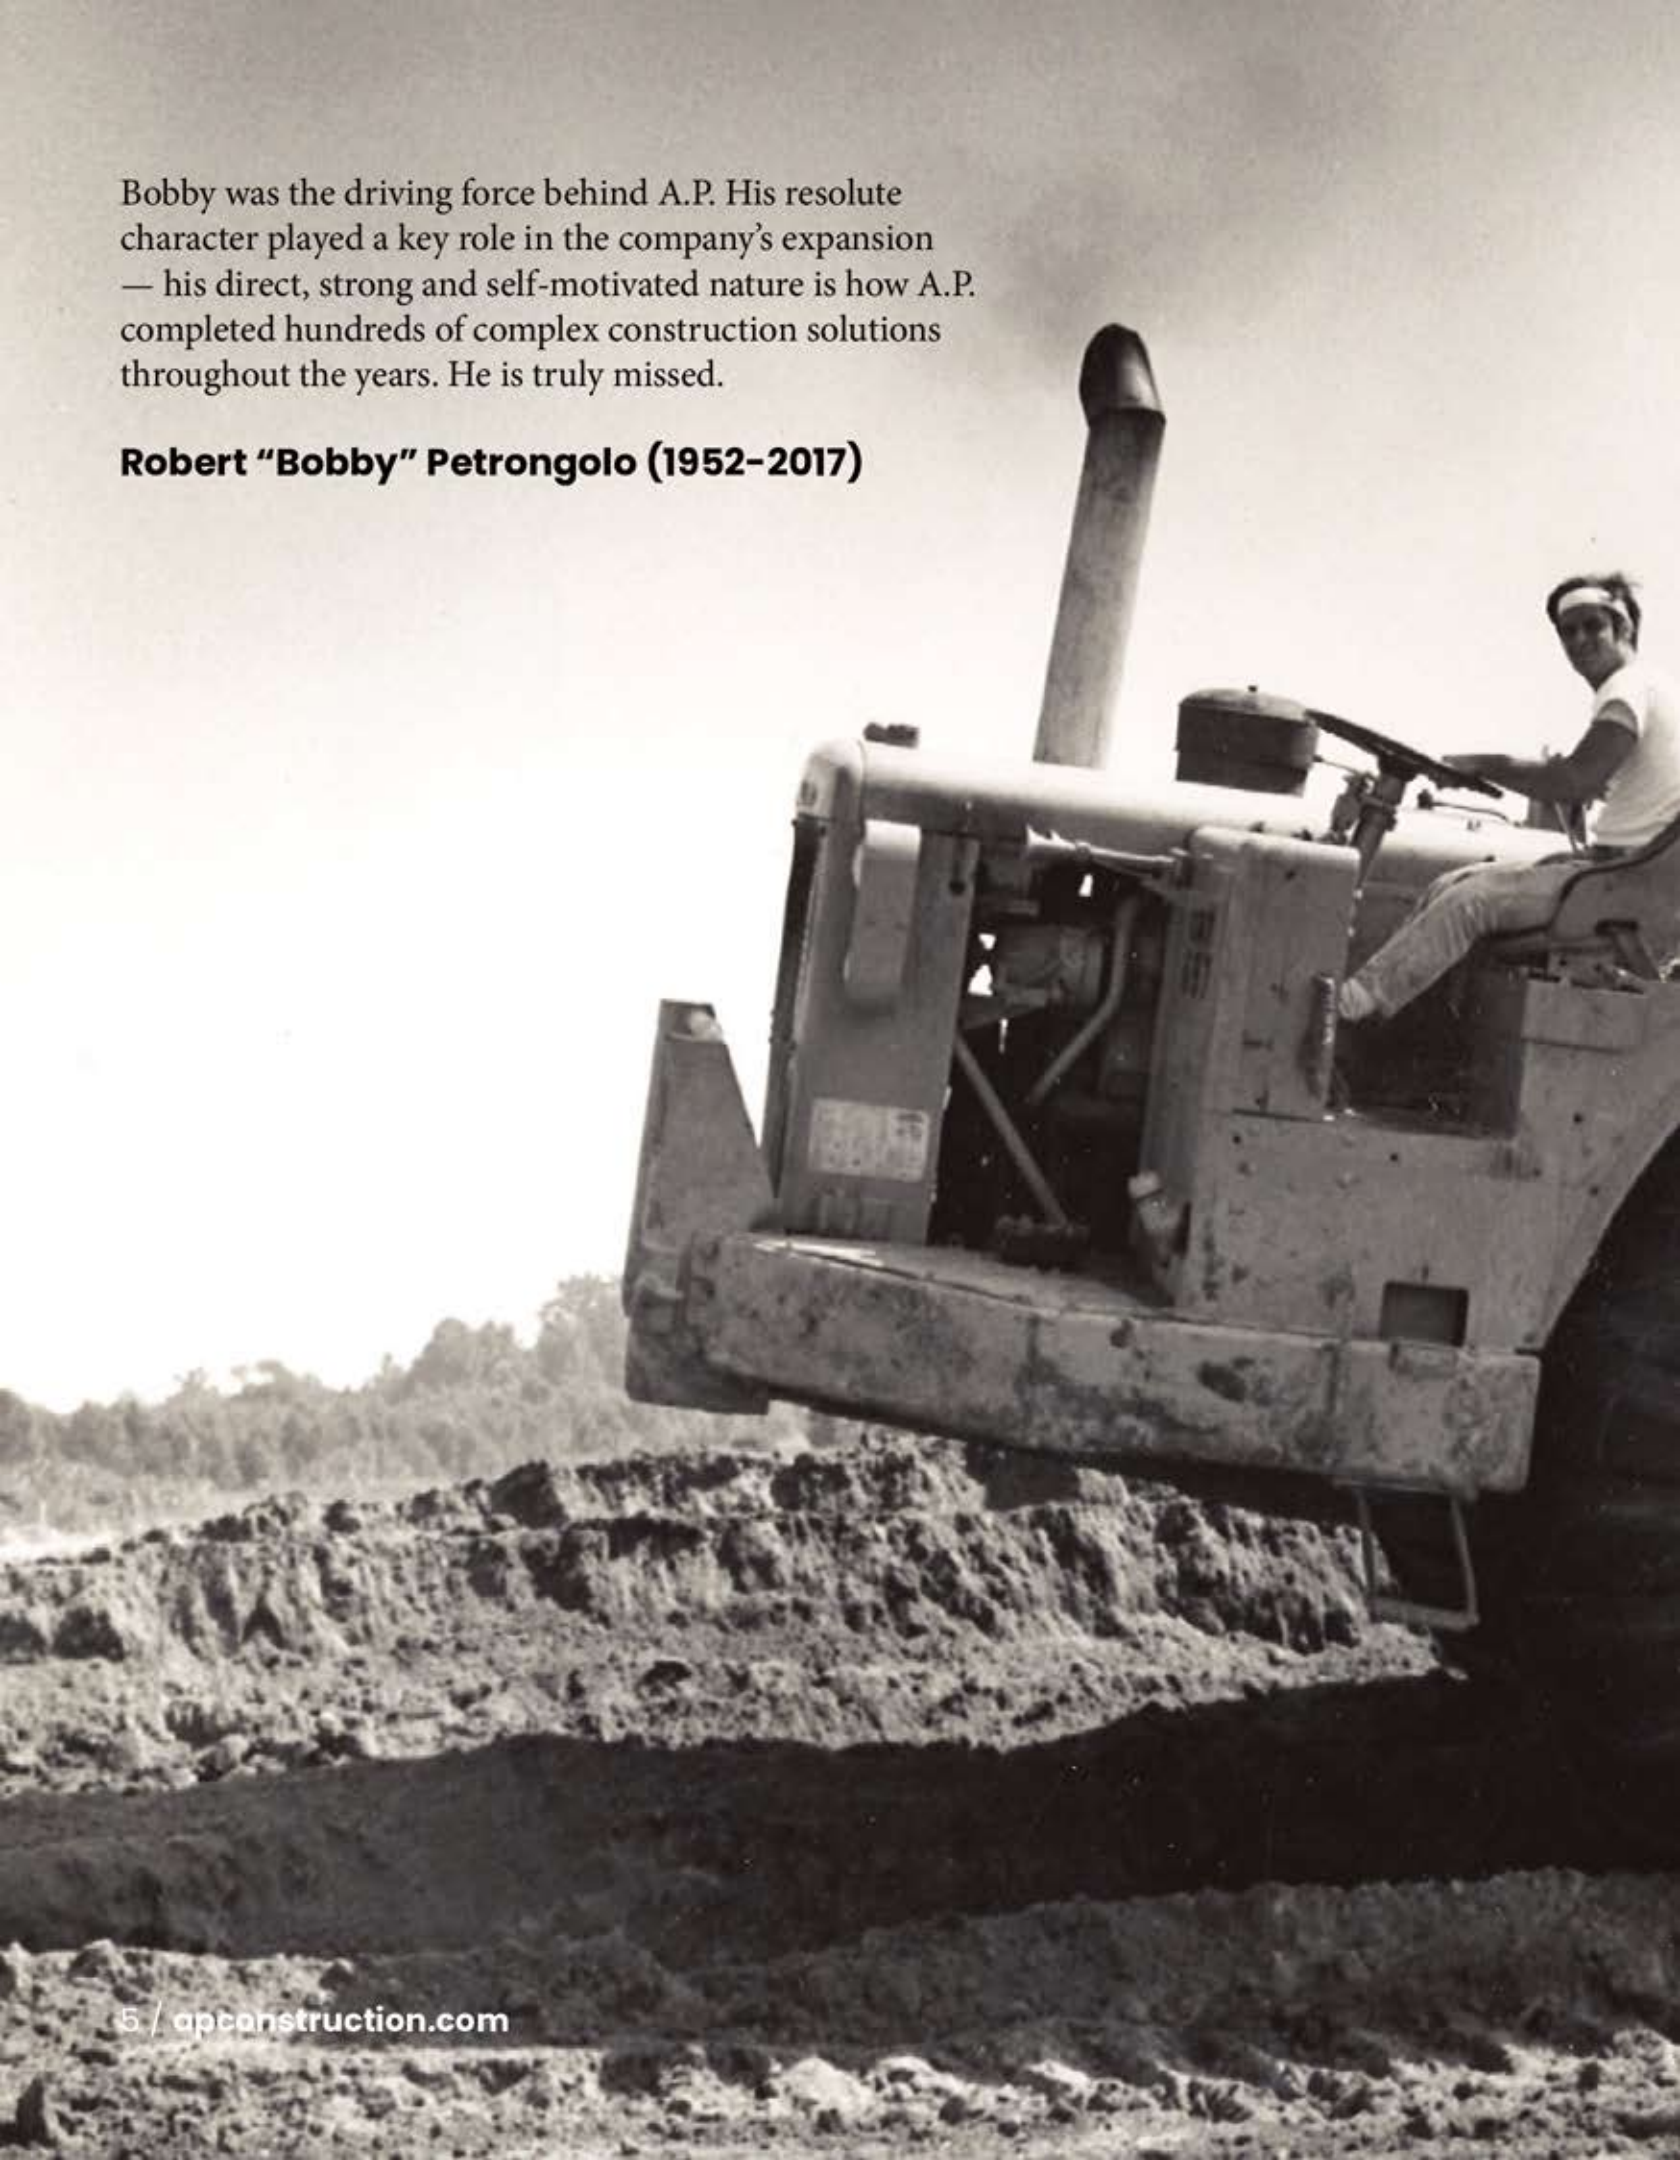
A.P. Construction has been *Safely Building Excellence* since in 1954.

Photo on page 3: *A purchase order for one of A.P.'s initial contracts, Boone Street, Philadelphia Utility/Sewer Main Installation project, awarded by the Philadelphia Water Department.*

Photos above: *Top: Amedeo, Sr., and his five sons; Middle: Amedeo, Sr. with sons, and inspector, on job site; Last: Echelon Mall project*

Bobby was the driving force behind A.P. His resolute character played a key role in the company's expansion — his direct, strong and self-motivated nature is how A.P. completed hundreds of complex construction solutions throughout the years. He is truly missed.

Robert "Bobby" Petrongolo (1952-2017)



Bobby operating a pan on the Echelon Mall (Voorhees Township, NJ) project in 1969.

1954-

1954

A.P. Construction, Inc. is founded by Amedeo Petrongolo, Sr. with a focus on general construction in the City of Philadelphia, New Jersey and the tri-state area. A.P. is awarded two significant PWD water and sewer projects, on Boone Street and Monument Street, in the City of Philadelphia.

1969

The comprehensive Echelon Mall (Voorhees, NJ) site development project, on behalf of the Rouse Company, aided in diversifying A.P. Construction's client portfolio, as well as the company's site development capabilities.

1997

The Kvaerner Philadelphia Shipyard project (currently the Aker Shipyard), a vast $19M development undertaking, clearly proves A.P.'s ability to successfully manage and complete large improvement projects.

1998

A.P. awarded the Columbus Boulevard, Philadelphia, roadway reconstruction project, a large-scale multi-million dollar undertaking, involves over two miles of roadway between Race Street and Aramingo Avenue, and meets the goals to improve safety and traffic flow on the active thoroughfare.

2012

A.P. Construction receives prestigious COTE Top Ten Green Projects Award from the American Institute of Architects for Kensington Creative and Performing Arts High School project. The school is the first LEED Platinum public high school in the nation.

2013

A.P. collaborates with Ameresco, Inc. (NYSE:AMRC) a leading renewable energy company to design, build and maintain an innovative wastewater biogas-to-energy facility for the Philadelphia Water Department (PWD), located in Philadelphia.

2022

1978

The Fairmount Park Commission engages A.P. to complete the intricate and highly-publicized Fairmount Park Fish Ladder Maritime project to help migrating fish continue upstream past the Fairmount Dam on the Schuylkill River.

1981

Philadelphia Water Department hires A.P. Construction, Inc. to complete the extensive $10.5M Belfield Avenue multi-phase culvert utility reconstruction project which was the largest dollar amount endeavor in A.P.'s history.

2001

A.P. Construction erects one of the most modern and cutting-edge training facilities in the NFL, the NovaCare Complex for the Philadelphia Eagles.

A.P. begins setting the foundation for the Philadelphia Eagles new stadium called Lincoln Financial Field.

2010

A.P. Construction holds the designation as the deepest excavation endeavor in Philadelphia history completing the CHOP South Campus Expansion job.

A.P. designs, builds and manages the creation of the $44M Kensington High School for Creative and Performing Arts, located in Kensington, Philadelphia.

2017

Crews from A.P. Construction begin the general construction of the Horowitz-Wasserman Holocaust Memorial Plaza, a major public monument dedicated to the victims and the remembrance of the Holocaust.

2022

A.P. continues $60M+ Mechanical/Facility Betterment at Torresdale Water Pumping Station general construction project that will last over five years to help better purify the water supply in the City of Philadelphia.

PHILADELPHIA ♥'s A.P.

A.P. IS PROUD TO BE PART OF THE CITY'S GROWTH AND MODERNIZATION

The Philadelphia region, from LOVE Park to Interstate 95 and beyond, continues to undergo an unprecedented development boom. In ways large and small, these projects are transforming the city and reflect how the region continues to evolve.

A.P. is humbled to have the opportunity to continuously collaborate with the City of Philadelphia, from rehabilitating parks to paving highways. We cherish our everlasting partnership in beautifying and enhancing the city, including the surrounding areas in Pennsylvania, New Jersey and Delaware.

A.P. Construction is now, more than ever, focused and committed to building Philadelphia and the region — from revitalizing piers, parks and plazas to building schools, stadiums and solar projects.

Read more about these A.P. Construction initiatives that are changing the landscape in the Delaware Valley on the following pages.

Torresdale Water Pumping Station
Philladelphia, PA

Atlantic City Airport Deicing Facility
Atlantic City, NJ

RACE STREET PIER

Yet another of Philadelphia's amazing outdoor spaces, Race Street Pier on the Delaware River Waterfront is a relaxing respite in the heart of the city. Race Street Pier is a perfect picnic spot with a spacious lawn featuring multiple types of grasses and perennials, along with more than three-dozen trees.

A.P. Construction is so proud to have been the general contractor for this now famous pier. The large rectangular platform has become a spectacular open space park that engages people from the adjacent neighborhoods, people from all parts of the city and tourists in a contemporary way to experience the Delaware River.

The physical design of the pier is split into two levels — an upper level with a grand sky promenade and a lower level for passive recreation and social gathering. A long ramp arises from the north face, alongside the Ben Franklin Bridge, dramatizing the sense of arriving in the space of the river.

The Race Street Pier was an early-action project that set new standards of excellence in design and public space for Philadelphia and is a prestigious project in A.P.'s general construction portfolio.

HORWITZ-WASSERMAN
HOLOCAUST MEMORIAL PLAZA

The Horwitz-Wasserman Holocaust Memorial Plaza is Philadelphia's public monument to memorialize victims of the Holocaust. It is located at 16th and Arch Streets, at the head of the Benjamin Franklin Parkway.

A.P. Construction, Inc. was honored to collaborate in this meaningful, high-profile tribute. As the general contractor on the project, A.P. completed the foundational work and installation of the memorials including: the Monument to Six Million Jewish Martyrs, representing the need to remember those lost and maintaining hope for the future; the Six Pillars honoring the six million Jewish lives lost; the Eternal Flame and the Theresienstadt tree sapling, symbolizing hope and light for the future; original train tracks from the railroad adjacent to the death camp of Treblinka in Poland embedded in the new plaza's paving, reminding visitors of the industrialized mass deportation of millions of victims; and a grove of trees representing the woodlands that sheltered those who resisted the Nazi regime.

Nestled into the fabric of the city, this plaza is visited day and night, by tourists and Philadelphians alike.

KENSINGTON HIGH SCHOOL
FOR THE CREATIVE AND PERFORMING ARTS

This School District of Philadelphia public high school was transformed by A.P. Construction — from a large, brown abandoned field into an award-winning, green inspired, light-filled school. The project promotes the meaning of living sustainably to students, staff and the entire community. It clearly demonstrates that even deteriorated urban landscapes can be revitalized to become sources of hope for the future. This school has become a symbol of the long-term goal of establishing a sustainable community in one of the most down-trodden areas of Philadelphia.

The Kensington Creative and Performing Arts High School is the first LEED Platinum public high school in the United States, and A.P. Construction could not be more proud. Topped with a distinctive saw-tooth roofline, this boutique academic institution provides a warm and welcoming environment to all of those who enter. The gunmetal-gray building has a beautiful gym and a 200-seat auditorium anchoring the main wing. The architecture provides innovative spaces for expansive dance and art studios. The facility can accommodate up to 500 students.

A.P. Construction is proud to have acted as developer and construction manager for this general construction project.

PHILA
DELPHIA

BUILT ON A STRONG FOUNDATION

Upon purchasing the Eagles in 1994, Jeffrey Lurie said that building a new, state-of-the-art stadium would be a key component in the effort to build the Eagles into an elite NFL franchise. "Winning the Super Bowl is the ultimate goal," said Lurie, the team's Chairman/CEO.

Stadiums and training facilities are a vital element in the success and stability of franchises on both a present and long-term basis. As an organization, the Philadelphia Eagles wanted to assemble the best staff and players, but also provide them with the finest facilities and environment in which to win.

Thanks to A.P. Construction, Lincoln Financial Field is one of the most up-scale and well-equipped facilities in the National Football League, and home to the Philadelphia Eagles. As the principal site developer, A.P set the foundation for the Super Bowl LII Champions. In addition, the NovaCare Complex, the club's corporate headquarters and training facility, was also built by A.P. Construction.

With regard to each venue, the Philadelphia Eagles have made a dramatic leap in their facility development. Both are striking in terms of their architecture and amenities, and both are seen as icons for the Eagles and for Philadelphia.

Lincoln Financial Field is located in the heart of South Philadelphia and holds approximately 66,000 fans.

Lincoln Financial Field is the first of its kind, solar and windmill-combination power generation stadium in the National Football League.

A.P. Construction had the opportunity to significantly increase Philadelphia's green initiatives by installing the utility piping for the stadium's solar and wind project. The complex is fitted with solar panels that operate continuously to supply energy, allowing the team's entire operation to be fueled by renewable energy. Most of the power comes from the solar parking panels and modules on the south side of the complex.

A.P. has played an essential role at Lincoln Financial Field to reduce waste, save energy and create clean power.

Lincoln Financial Field

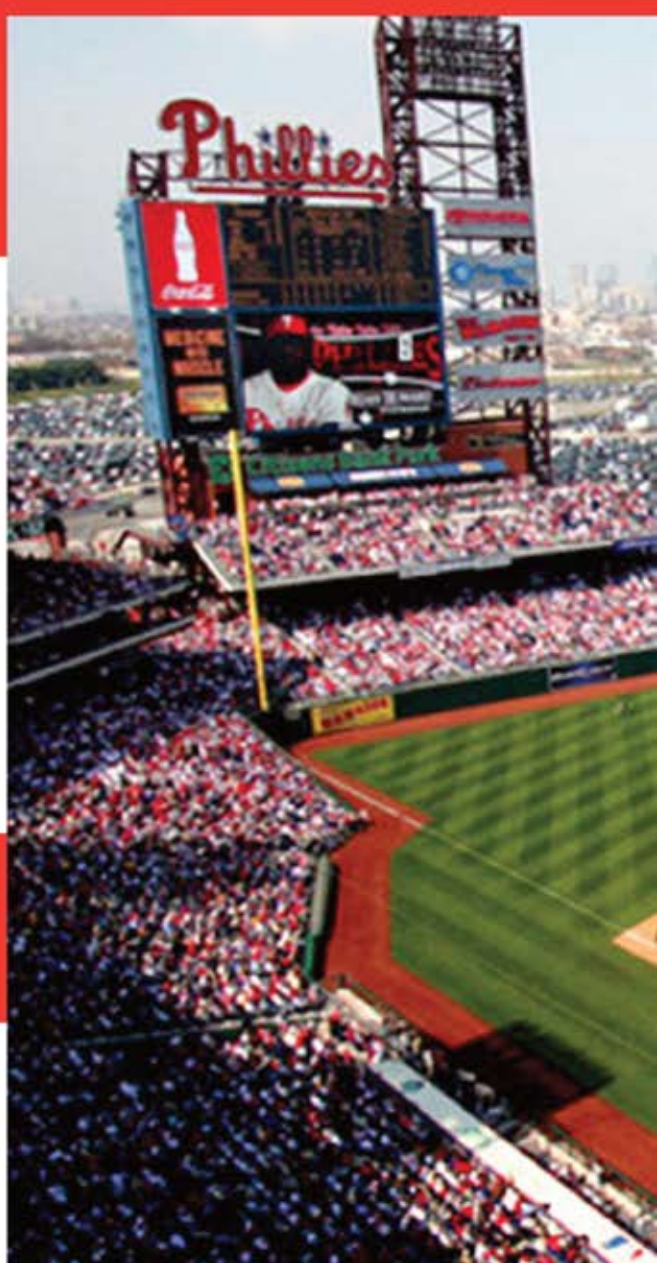
Foundation: **2001 /** Solar: **2016**

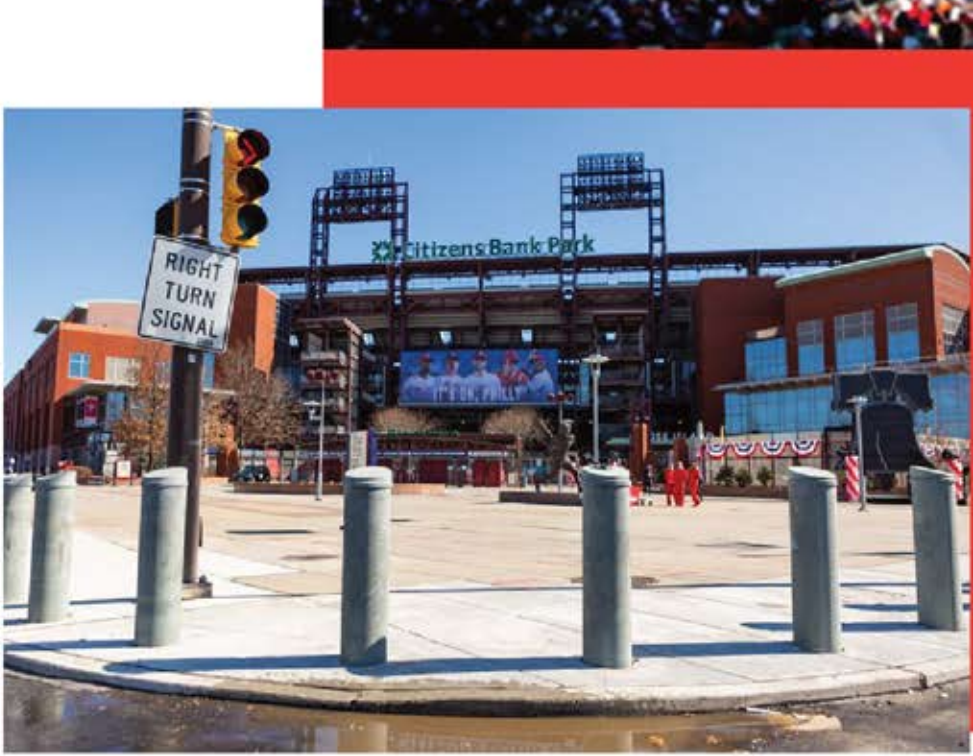
PHILLIES BALLPARK

The home of the Philadelphia Phillies since April 2004, Citizens Bank Park is a 43,500-seat stadium that provides a complete baseball and entertainment experience.

With lush natural grass, modern amenities and a view of the Philadelphia skyline, this world-class ballpark is every bit as spectacular as it is intimate. It is considered one of the most kid-friendly ballparks in Major League Baseball with an in-stadium entertainment complex called Ashburn Alley, named nostalgically after Phillies great Richie Ashburn. Ashburn Alley features a memory lane of Phillies lore, shops, eateries and baseball inspired games for all. The complex was honored with the title of Best Ballpark Eats by the Food Network which emphasizes the high quality and variety of food options available to fans.

Apart from the amenities, the stadium is one of the safest in the country directly due to the perimeter security completed by A.P. Construction for the "Fightin' Phils".





Citizens Bank Park has one of the most robust bollard initiatives in the league. A.P. installed the bollards — pillars that stand approximately waist-high — around the perimeter of the ballpark, including lining the ground's third base gate. The large thick structures are an added security measure to protect fans. The posts were formed from concrete and rebar that derive their strength from the portion that extends several feet below the ground.

But impact protection wasn't the only factor needed for this A.P. security construction project. The perimeter barriers were also installed to avoid unwanted vehicle clutter for baseball fans. Unlike other types of barriers, such as fences or large concrete blocks, security bollards restrict vehicle access while allowing clear pedestrian flow. Security bollards act as both a physical and visual barrier as they protect the fans and the park by creating a controlled traffic setting.

In addition to safety and pedestrian flow, the design strategies set for this undertaking involving aesthetics were also met by the A.P. Construction team.

A FAMILY BUSINESS WHERE EVERYONE IS FAMILY

At A.P. Construction, our employees are dedicated; they are extremely valued assets; they are family. They are intelligent, hard-working and motivated individuals who give their all for the common goal of *Safely Building Excellence* in the construction industry.

Our employees are diverse and driven, old and young, experienced in what they do. That is the advantage of hiring A.P. Construction for a project — our people. We call it the AP Advantage: the advantage of working closely with seasoned professionals who know the industry and who get the job done on-time, on-budget and safely.

Why do they stay with A.P. Construction?

- **Lee Norelli** has been an estimator with A.P. for 22 years: "I feel that my work matters."
- **Glenn Albertson** is a field manager with A.P. Construction for 32 years: "A.P. is dedicated to their employees."
- **Archie Baldwin Jr.** has been an operator with A.P. for 12 years: "My father worked for A.P. for almost 30 years, so we are family."
- **Livingston White** has been a foreman with A.P. for 38 years: "Because safety is their number one priority."
- **Robert Wagner** has been a superintendent with A.P. Construction for 22 years: "A.P. really cares about us on an individual level, and they show it."
- **Scotty Creelman** has been a marine construction project manager with A.P. for 23 years: "I stay at A.P. because of the diversity of work and I am treated like family."
- **Elwood Harris** has been a truck driver with A.P. for 36 years: "A.P. has the best and safest trucks out there!"

As you can see, our employees stay because of the many advantages... one of which is becoming part of the *family*.

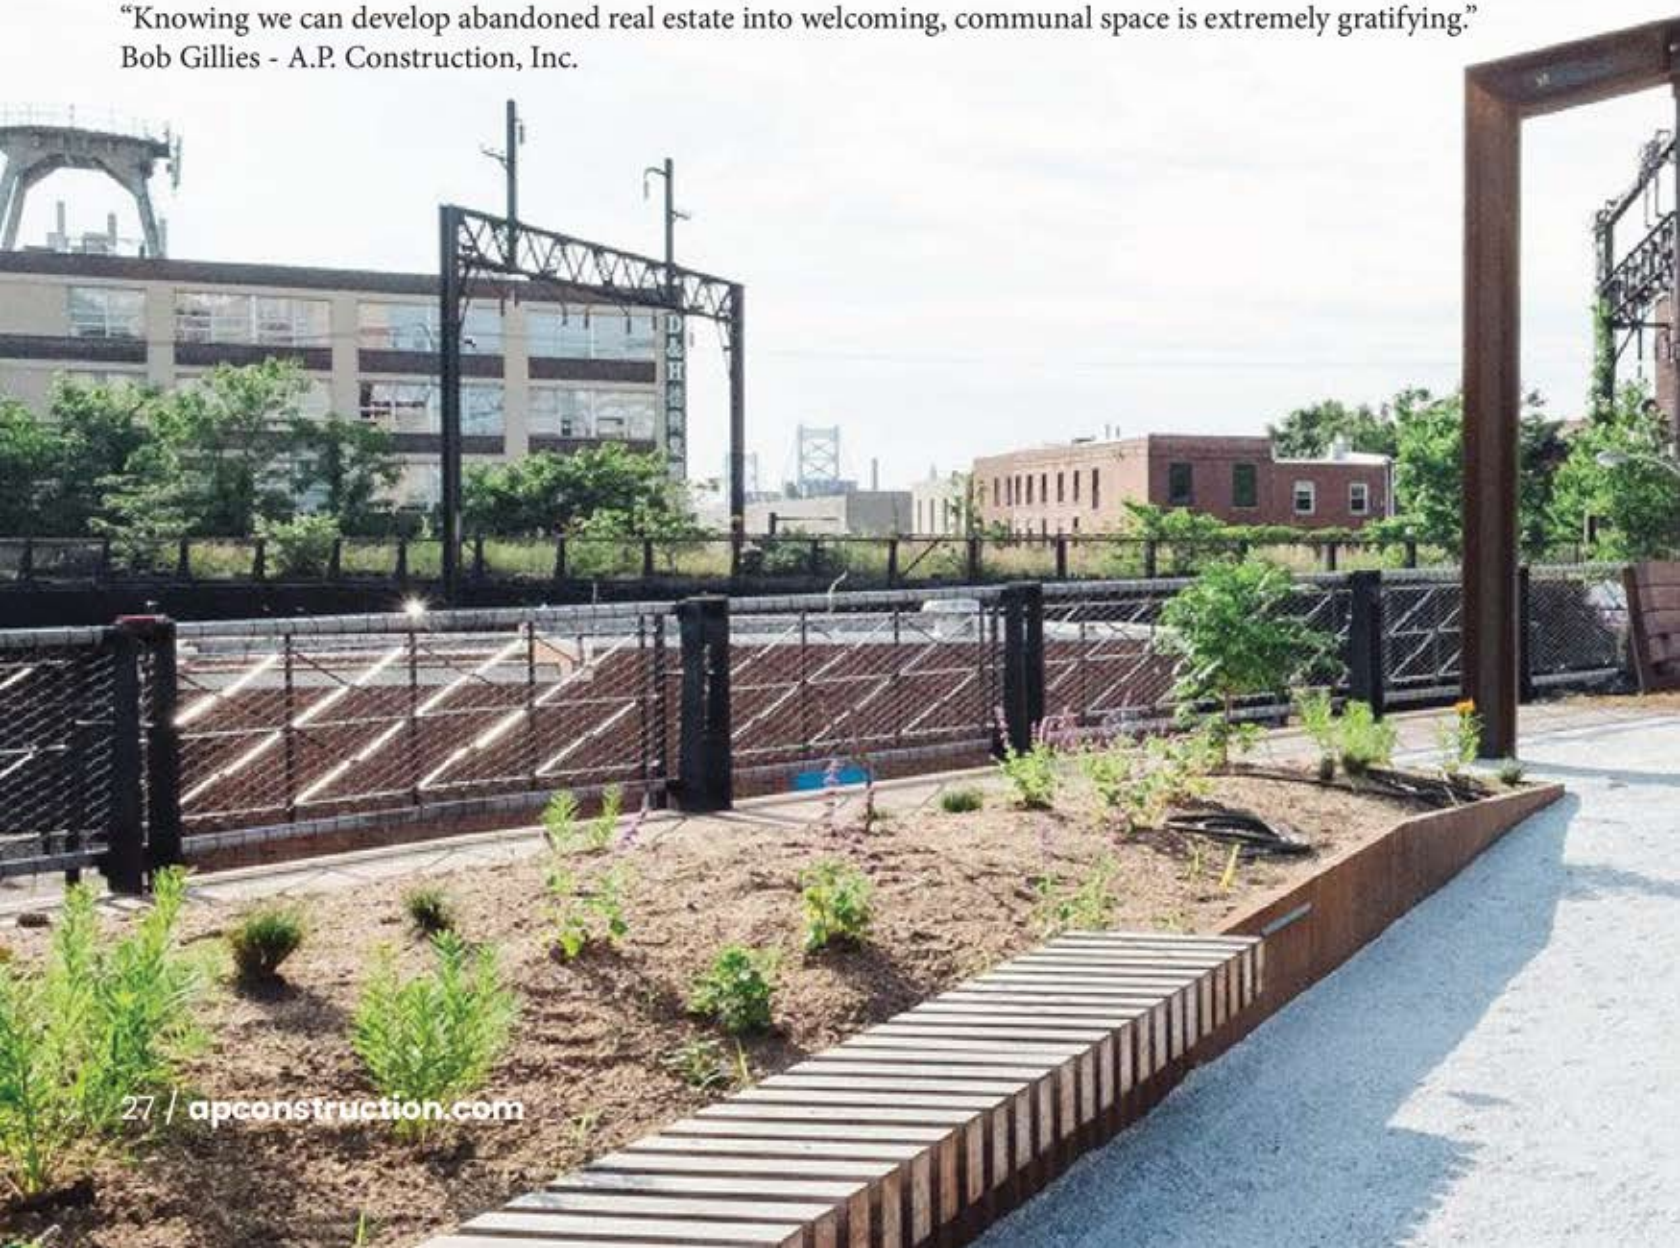
THE AP ADVANTAGE...
OUR EMPLOYEES

CONNECTING PEOPLE + PLACES

Today, A.P. Construction is privileged to play a key role in Philadelphia's development evolution — connecting people with places, replacing run down areas with new, vibrant and inviting improvements throughout the city and the Delaware Valley.

The unique parks, extended bridges, safe connectors, green trails, underground concourses and links we build enhance the quality of life for all of those who utilize these new spaces. Needless to say this is very interesting and rewarding work for A.P. Construction and our team members.

"Knowing we can develop abandoned real estate into welcoming, communal space is extremely gratifying."
Bob Gillies - A.P. Construction, Inc.



THE RAIL PARK

On the northern edge of Philadelphia's Chinatown, sits a redeveloped oasis, a testament to the city's ability to coax new life from neglected ruins. It's called the Rail Park. Completed by A.P. Construction, the Rail Park was built on the original railways of Reading Terminal, with the full vision including three phases: Phase One: The Viaduct, Phase Two: The Cut and Phase Three: The Tunnel.

The location is unlike any other in Philadelphia because of its history, span, elevation and greenery. In Phase One, A.P. Construction revitalized a quarter-mile stretch of abandoned train tracks into a spacious, elevated park. A.P.'s efforts included infrastructure, foundation, landscaping, painting, bridge rehabilitation and various restoration, repairs and installation tasks.

If you visit the Rail Park you will experience why A.P. was thrilled to have been involved with this project.

MANAYUNK BRIDGE
CONNECTOR TRAIL AND PARK

A.P. Construction is proud to have been involved in this bridge project that beautifies the city and creates usable public space from a dilapidated property.

The Manayunk Bridge Trail and Park was developed by restoring a historic bridge after several decades of abandonment. In the process, the short but significant path linked two other popular trails in neighboring Montgomery and Philadelphia Counties, allowing for the connection of communities that once had no association. The route crosses the Schuylkill River and Schuylkill Expressway (Interstate 76) and features separate areas for walking and bicycling, along with a shared plaza that can be used for special events. Railings and fencing are in keeping with the historic industrial nature of the Manayunk Bridge, bringing out the architecture of past times.

The Manayunk Bridge Trail offers sweeping views of the Schuylkill River, Schuylkill Canal and downtown Manayunk, making it a true bridge — connecting people and places.

THE DOWNTOWN LINK
SEPTA'S UNDERGROUND CONCOURSE

The full makeover of the "Downtown Link" now invites pedestrians to find a more appealing and safe way to reach their destination. The SEPTA Underground Concourse began an entire renovation and revamping of the public concourse from 13th Street to Market Street and from 15th Street to Market Street (just below City Hall).

A.P. Construction's undertaking consisted of installing new tile and concrete that interlines throughout the 22,000 square feet of the passageways. The long, refurbished corridors now diverge from the freshly installed Oculus, the centerpiece of the concourse. Glass block walls and attractive wall surfaces serve as a backdrop for the newly-added innovative, interactive advertising and signage displays.

The project also incorporated epoxy flooring throughout all of the corridors and lobby improvements at the Wanamaker Building entrance which comprises stainless steel finishes and features a relocated tile mosaic mural.

This SEPTA Underground Concourse project is a prime example of A.P. Construction's general construction abilities.

TO MOVE FORWARD, YOU HAVE TO GIVE BACK.

A.P. Construction, Inc. is planning for the future of those around us. Our Community Fostering Program (CFP) objective is to give back to our employees, our clients and our community.

The CFP steers the philanthropy of our company as we move ahead, maximizing long-term development, environmental protection, social responsibility and community relations.

Some of our ongoing initiatives are:

- Sponsoring community self-sufficiency by providing skills and education to students in the Drexel Co-op Program
- Enriching the quality of life in our community youth by donating to organizations, such as the Mainstage Center for the Arts, in Blackwood, NJ
- Promoting industry interest by supporting the ACE Mentoring Program, in Philadelphia, PA
- Aiding the resurgence of our waterfronts with the Delaware River Waterfront Corporation and the Camden Community Partnership
- Supporting services for the less fortunate such as the Philabundance and UNICO
- Participating in and monetarily supporting charitable and community programs, such as the March of Dimes
- Continual involvement in local volunteer activities in our region, such as Alex's Lemonade Stand

SAFELY BUILDING EXCELLENCE

The Environmental Health and Safety Division of A.P. Construction, Inc. is an integral part of the company's overall risk management. The division is responsible for the oversight and implementation of the entire company's health and safety programs. A.P. Construction's history has demonstrated that the more aligned all involved parties are with our safety program — including employees, subcontractors and partners — the safer the project outcome. At A.P. Construction, Inc. we evaluate our operations continuously to make our organization safe.

A.P.'s safety-first attitude is ingrained in each project — from the bid process to the punch list. Our safety engagements start at the beginning of each project. We perform compulsory safety inspections on every jobsite on a daily basis; we hold weekly ToolBox Talks on each project; and we perform job-specific OSHA training regularly — all of which has created an effective, reliable and safe environment for all.

STEVEN MARTIN
DIRECTOR OF SAFETY - A.P. CONSTRUCTION, INC.

SAFETY INITIATIVES

- YEARLY STAND DOWN MEETINGS
- WEEKLY INSPECTION REPORTS
- JOB SITE SPECIFIC CHECKLISTS
- TOOL BOX TALKS EVERY FRIDAY
- OSHA COMPLIANT
- EXCELLENT EXPERIENCE MODIFICATION RATE
- DAILY INSPECTED EQUIPMENT
- 95% EMPLOYEE RETENTION RATE

WE WILL...

Vision

Continue to be a locally focused, general construction firm, by realizing notable results for our clients, rewarding careers for our employees and a fair profit on the value we provide.

Our Mission

Safely build Philadelphia and the tri-state area, utilizing the most up-to-date technologies, while creating lasting relationships via honest and dependable hard work.

Our Values

Focus on safety; build open and honest relationships; listen attentively, communicate swiftly and react quickly; be dedicated; hire and support locally; work hard and intelligently; pursue growth and learning; and plan for the future.

Focus on safety … it's worth repeating.

Our Maxim

Safely Building Excellence.

A.P. Construction is dispersed throughout the Delaware Valley with offices located in Philadelphia at the Navy Yard Corporate Center and Blackwood, NJ.

AP Construction
ESTABLISHED 1954

A.P. Construction, Inc. is a trusted family-owned general construction firm located in Philadelphia and New Jersey. Differentiated by excellence, leveraged by our people and our steadfast ambition to deliver the most successful results, we align our capabilities to our clients' objectives to create a permanent and positive impact.

Made with ♥ in Philadelphia
